

"Imagining that technology alone can liberate us is a bit shortsighted and, in some ways, disabling."

—p. 42

Front

THE DOWNLOAD

- 7** Giving all countries a say on solar geoengineering; blimps make a comeback; lawyers in the metaverse; creating comics for the visually impaired; an app for immigrant victims of wage theft; forest bathing, digital-style; what to do about robotaxis.

EXPLAINED

- 20** How can heat pumps combat climate change?
We're entering the era of the heat pump. Here's a guide to how they work.
By Casey Crownhart

PROFILE

- 22** Mapping to save the world
Molly Burhans is using GIS tools to map the Catholic Church's global landholdings—and fight climate change.
By Whitney Bauck

The accessibility issue

26 Introduction: The future is disabled

We need to take steps toward a more inclusive future—one that we all can inhabit.

BY ASHLEY SHEW, GUEST EDITOR

28 Getting in touch with images

At the New York Public Library, blind educator Chancey Fleet is working to make images accessible to everyone. BY CHANCEY FLEET

36 Connecting climate change and the digital divide

Monica Sanders has spent her career advocating for more equitable disaster policies. She believes broadband access needs to be a part of that conversation.

BY COLLEEN HAGERTY

42 Still finding their voice

For decades, assistive communication devices were available only to a small fraction of non-speaking people. The iPad should have revolutionized access. What happened? BY JULIE KIM

50 The border lottery

An app was meant to streamline immigration at the border. It may be making things worse. BY LORENA RÍOS

62 Sonifying the sky

Astronomers and other scientists are exploring ways to make data more accessible through sound.

BY COREY S. POWELL

Back

70 An unnatural world

Three books that grapple with the role of humans in restoring natural ecosystems.
By Matthew Ponsford

76 Lithography's long journey

The technologies that produce today's chips are among humankind's most complex inventions. By Chris Miller

FIELD NOTES

84 The forgotten history of highway photologs

Decades before Google Street View, state government vans were photographing each mile of roadway.
By Jon Keegan

PUZZLE

88 AI did not make this crossword
